About Mulberry Leaf

Mulberry is widely planted in China and its leaf is the food for silkworms. It has been listed in the homology of medicine and food for a very long time. Mulberry leaf is called “fairy grass” in the Chinese traditional pharmacopeia *The Compendium of Materia Medica*.

In the 1990s, mulberry leaf got very popular in Japan. The Japanese regard it as one of the secrets for long life and fresh mulberry leaf juice sweeps the trend, other products like mulberry leaf tea, noodles and cookies are well-welcomed too.

Recent scientific studies have disclosed mulberry leaf is an excellent natural solution for adjusting blood glucose and serum lipid, therefore in America and Europe mulberry leaf has become the most popular antidiabetic supplement/nutraceuticals.

Mulberry Leaf Extract

Natural Antidiabetic Solution

ACE™ Mulberry Leaf Extract

ACE Biotechnology’s mulberry leaves are certified organic (USDA NOP). We select the 1st ~ 3rd new leaves on the branches in the late period of spring silkworm to ensure the best quality starting materials are used to manufacture the extract.

The extracts are carefully processed to concentrate the phytonutrients (flavonoids, polyphenols, alkaloids, etc.) of this herb, and standardized to 1-Deoxynojirimycin (known as 1-DNJ) which is reported responsible for antidiabetic property.
